INTERESTS

- Technical discoveries, technology watch, continuous learning
- Enhancing workflows & processes, ergonomics & usability
- Taste for synthesis, redaction and transmission
- Live & studio musician, self-employed

As a live sound engineer, and then as a projects manager for sound reinforcement operations, I have always been passionate about optimizing tools and processes at work. It led me to discovering web development in 2020, first on my own, then thanks to the full-time Web Developement bootcamp in Le Wagon Paris. Im a now looking forward to joining a company as a web developer

SKILLS

Backend & Database

Ruby & Rails, PostGreSQL, Git / GitHub & Heroku, notions in Node / ExpressJS & MongoDB

Frontend & Design

HTML & CSS, Javascript ES6, Bootstrap, StimulusJS, Figma

Live sound reinforcement

Hiring and management of technical teams, logistics and planning
Expertise in the scope of sound reinforcement for concerts and major events.

Soft skills

Product mindset (OOP / MVC architecture), UX/UI, collaborative workflow, project management
